DUTIES: This is a supervisory position assigned to Quality Management Section of the Office of the Director. The incumbent serves as the Facility Safety Officer for VA Palo Alto Health Care System and acts as technical authority for occupational health and safety matters. As a permanent member of the hospital Safety Committee, the employee provides expertise and advice to hospital personnel on a wide variety of industrial work situations including but not limited to laboratory and maintenance operations. He/she acts as liaison between Environmental Health and Safety Section and VAPA service chiefs and staff and as a direct contact person and liaison to outside regulatory Federal, State and County agencies (ie: OSHA, local fire departments, and county and state health and safety departments). Responsibilities include: preparation, writing and timely submission of all intern/external documentation, reports and correspondence; implementation and periodic review of current safety management programs, policies and processes and applicable changed in operations and regulations; provides technical assistance, program direction, guidance, interpretation, compliance, and coordinative support in all areas of occupational safety; coordinates required environmental and abatement programs; audits records of industrial accidents and other indicators to assess the state of the occupational environment of the facility; integrates new policy issuances, occupational standards and other industry requirements into agency operations; and, provides training to program staff and facility managers and/or supervisory personnel in matters related to occupational health and safety.

QUALIFICATION REQUIREMENTS:

One (1) year of specialized experience equivalent to at least the GS-11 level in the Federal Service.

Specialized experience is experience that is typically in or related safety and occupational health that provided the specific knowledge, skills, and abilities to perform successfully the duties of the position. Examples of qualifying specialized experience include:

- Managing safety or occupational health program elements.
- Developing and recommending safety and occupational health policy to higher levels of management.
- Applying safety and occupational health laws, regulations, principles, theories, practices, and procedures to advise on or resolve technical matters dealing with occupational safety and health requirements.
- Developing safety and occupational health standards, regulations, practices, and procedures to eliminate or control potential hazards.
- Developing or implementing programs to reduce the frequency, severity, and cost of accidents and occupational illnesses.
- Analyzing or evaluating new and existing jobs, processes, products, or other systems to determine the existence, severity, probability, and outcome of hazards.
- Designing or modifying workplaces, processes, products, or other systems to control or eliminate hazards.
- Inspecting or surveying workplaces, processes, products, or other systems for compliance with established safety and occupational health policies or standards and to identify potential new hazards.
- Training of workers, supervisors, managers, or other safety and occupational health personnel in safety or occupational health subjects.
- Work in occupational fields such as industrial hygienist, safety engineer, fire prevention engineer, health physicist, and occupational health nurse.

SUBSTITUTION OF EDUCATION FOR EXPERIENCE: NONE

VOLUNTEER EXPERIENCE: Appropriate credit will be given for voluntary participation in community, social service, and similar activities.

BASIS OF RATING: Your rating will be based on the quality of your experience as shown in your application and elements. Listed below are the knowledge, skills and abilities considered essential for successful performance in this position. These elements will be used to determine the highly qualified candidates to be referred to the selecting official. Provide, on a separate sheet of paper, a DETAILED description of your experience as related to the knowledge, skills and abilities listed below. Incomplete, vague, or contradictory information may affect your rating.

1. Knowledge of safety and occupational health principles, practices, procedures, and regulations applicable to the performance of a full range of safety responsibilities at a health care facility.
2. Ability to plan, organize and evaluate a safety program involving plan and maintenance shop operations as well as construction projects.
3. Knowledge of construction standards, practices, building materials, and installation and maintenance of utilities sufficient to develop effective controls of work and equipment hazards.
4. Ability to conduct a wide variety of activities promoting safe work practices, use of protective equipment, and proper equipment operation procedures.
5. Skill in interpreting engineering drawings and specifications sufficient to identify potential hazardous conditions in proposed facilities or activity sites.
